

Lesson Plan for Course: B.Sc (Sem-I) (DSC) Code: MTMGCOR01T Credit: 6

- Course Name: Differential Calculus
- Course coordinator: Dr. Pintu Debnath
- Course Outcomes:
 - CO-1. Learn ϵ and δ definition of limit and continuity of a real-valued function.
 - CO-2. Apply Leibnitz's theorem to derive successive differentiation.
 - CO-3. Concept of Euler's theorem and its application on homogeneous function.
 - CO-4. Able to find out tangents, normals, curvature, asymptotes, singular points of any curves.
 - CO-5. To understand Rolle's theorem and several mean value theorems and their applications including the problems related to maxima minima and indeterminate form.

Course planner

Month	Course Topic	Teacher	Class-hour	Remarks*
Dec				Class will be started from 02.01.2021
Jan	Tangents and normals, Curvature, Asymptotes.	BS	06	Theoretical – 04 Tutorial - 02
	Rolle's theorem, Mean Value theorems, Taylor's theorem with Lagrange's and Cauchy's forms of remainder, Taylor's series, Maclaurin's series of $\sin x$, $\cos x$, e^x , $\log(l+x)$, $(l+x)^n$.	SM	06	Theoretical – 04 Tutorial - 02
	Limit and Continuity (ϵ and δ definition), Types of discontinuities, Differentiability of functions, Successive differentiation, Leibnitz's theorem.	PD	06	Theoretical – 04 Tutorial - 02
1st Internal Assessment				
Feb	Singular points, Tracing of curves. Parametric representation of curves and tracing of parametric curves.	BS	06	Theoretical – 04 Tutorial - 02
	Maxima and Minima, Indeterminate forms.	SM	06	Theoretical – 04 Tutorial - 02
	Partial differentiation, Euler's theorem on homogeneous functions.	PD	06	Theoretical – 04 Tutorial - 02
2nd Internal Assessment				
Mar	Revision	BS	02	Theoretical – 06 Tutorial - 00
		SM	02	
		PD	02	
End Semester Examination				
	Assessment: Internal Assessment & Assignment		Total: 42 Hrs	Theoretical – 30 Tutorial - 12

Books:

- B. Pal, S. Raychowdhury, S. Jana, Differential Equation, Semester-I, Santra Publication Pvt. Ltd., Kolkata-700073.
- S. K. MAPA, Introduction to Real Analysis, Sarat Book Distributor, India, 2019.

Lesson Plan for Course: B.Sc(Sem-I) (GE) Code: MTMHGEC01T Credit: 6

- Course Name: Differential Calculus
- Course coordinator: Dr. Sudip Mondal
- Course Outcomes:
 - CO-1. Learn ϵ and δ definition of limit and continuity of a real-valued function.

Lesson Plan for Course: B.Sc (Sem-III) (DSC) Code: MTMGCOR03T Credit: 6

- Course Name: Real Analysis
- Course coordinator: Biswajit Sarkar
- Course Outcomes:
 - CO-1. Understand some properties of sets in \mathbb{R} .
 - CO-2. Able to solve problems related with real sequence.
 - CO-3. Learn about infinite series and their tests of convergence.
 - CO-4. To understand about Sequences and series of functions.
 - CO-5. Able to find radius of convergence of power series.

Course planner

Month	Course Topic	Teacher	Class-hour	Remarks*
Jul-Oct	<ul style="list-style-type: none"> • Finite and infinite sets, • Real Sequence, 			Course topics of these units have been completed
Jan	Sequences and series of functions, Pointwise and uniform convergence. M_n -test, M-test, Statements of the results about uniform convergence.	SM	06	Theoretical – 04 Tutorial - 02
	Infinite series. Cauchy convergence criterion for series, positive term series, geometric series, comparison test, convergence of p-series, Root test, Ratio test, alternating series, Leibnitz's test (Tests of Convergence without proof).	PD	06	Theoretical – 04 Tutorial - 02
1st Internal Assessment				
Feb	Statements of the results about integrability and differentiability of functions, Power series and radius of convergence.	SM	06	Theoretical – 04 Tutorial - 02
	Definition and examples of absolute and conditional convergence of infinite series.	PD	06	Theoretical – 04 Tutorial - 02
	2nd Internal Assessment			
	Revision	SM PD	02 02	Theoretical – 04 Tutorial - 00

Lesson Plan for Course: B.Sc (Sem-III) (DSC) Code: MTMSSEC01M Credit: 6

- Course Name: C-Programming Language
- Course coordinator: Biswajit Sarkar
- Course Outcomes:
 - CO-1. Learn high-level programming languages.
 - CO-2. Able to construct flowchart.
 - CO-3. To know about some arithmetic operators and logical operators.
 - CO-4. Able to use for loop, while loop and do-while loop in C-programming.
 - CO-5. Capable to write programming for finding out maximum, minimum of a given set of numbers.

- Course Name: Matrices
- Course coordinator: Dr. Sudip Mondal
- Course Outcomes:
 - CO-1. To form vector space and subspace over \mathbb{R} and to find their standard basis.
 - CO-2. To conceptualize translation, dilation, rotation, reflection in a point, line and plane (in matrix form) and able to interpret eigen values and eigen vectors of these transformations including eigen spaces.
 - CO-3. Able to calculate rank of matrices, to reduce in normal form and to solve linear homogeneous and non-homogeneous equations.
 - CO-4. Able to reduce matrices to diagonal form through eigen values and eigen vectors.
 - CO-5. Capable to applying elementary row operations to compute matrix rank and inverses, and to solve system of linear equations.
